

RIMFIRE 22LR

Rimfire Modified Benchrest Challenge

For this event:

- Follow modified ARA Bench Rest Rules
- Won't break the bank
- Test Your Skills
- Teach others
- Learn from others
- Have some fun with others
- Bring the family

Save the Date: 06/05/22

Bring out the ole 22LR caliber rifle to the range and test or challenge your shooting skills in a friendly bench rest shooting event. The shooters will follow a modified version of the ARA Benchrest Shooting Competition shooting 25 bull targets. If you are interested come out for a fun day for some friendly shooting at the range, bring your family or friends. Depending on the number of interested parties, we may have several divisions in a factory or unlimited classification.

If you are interested in participating please reach out to Tom.Sanford@airfieldshootingclub.org for more details and an electronic copy of the modified rules.

Schedule for this event

Sunrise—8:30 Sighting in Period

10:20—10:30 Range is Cold/Targets & Scoring
4th, 5th, 6th Relaysetc... until

All participants must attend the Safety Meeting to shoot!

The American Rimfire Association

For those who might not know, the ARA was started in April 1988 by a group of .22LR shooters who wanted competitive .22LR benchrest competition, matches, a means for consistent scoring and a platform for maintaining shooter statistics. American Rimfire Association has grown since then promoting clubs, expanding competitions across the United States. The ARA has been instrumental in offering matches and tournaments to anyone interested in precision .22LR bench rest style shooting.

The matches will follow a modified rule set for this fun event outlined below. Each participant will compete in a .22LR timed relay style shooting match using ARA style targets from a bench rest at the 50-yard line. The number of relays (2 to 6 relays) will depend on the number of shooters participating.

"We will be asking for help setting up the event, two volunteers to be the Range Safety Officer, magazine loaders, target handlers and an official score keep...if we run short on volunteers, to make this a success we may draw from the participants to help"

-Tom Sanford
